### ➤ IPTV:-

Internet Protocol Television (IPTV) is the delivery of broadcast-quality television and/or video signals to subscribers over a broadband connection using the Internet Protocol (IP). In this service the TV channels are encoded in IP format and delivered to TV through a Set Top Box. The IP TV Service also includes Video on Demand Service which is similar to watching Video CDs / DVDs using a VCD/DVD player. Movies, Instructional Videos and other content shall be available to customers in the IP TV Services.

IPTV's ability to provide two-way communication (you request a programme from the TV guide and the programme is delivered to you) offers interactivity for the customer. Movies, past TV shows and other content can be distributed on demand, and service providers can tailor the requested content and advertising based on the customer's preferences.

IPTV services are available in Ahmedabad, Vadodara & Rajkot.

At Surat & Mehsana will be available shortly.
